TITLE

Access control requirements for privacy and security **Kingslake, R** 312
Achieving privacy — how to reorganize our databases **Davida, G** 218
Anatomy of privacy and data protection **Sutcliffe, A** 255
A 'perfect' computer crime **Jacobson, R** 160
Automation of bias: computer models and local government budgeting **Dutton, W and Kraemer, K** 303
Background to data protection in Europe **Carmody, F** 24
Code of practice for privacy **Waller, R** 22
Computer-held patient records: the Exeter project **Clarke, DJ, Fisher, RH and Ling, G** 164
Computers, information retrieval and privacy **Samet, PA** 172
Computer systems procurement **Medina, B** 315
Contacts between clients and organizations **Blekeli, RD** 265
Database management system: master or servant? **Scarrott, GG and Mitchell, RW** 208
Data legislation on the march **Hondius, F** 4
Data policy in Sweden **Freese, J** 226
Designing automated systems to ensure security and privacy **Medina, B** 203
Developing computer systems for personnel records **Williams, AP** 196
Does computer security meet privacy requirements? **Ellison, R** 33
Encryption protection of data and computer systems **Pritchard, J** 154
Encryption protection of data and computer systems: Part 2 **Pritchard, J** 259
Establishment of audit trails in computer systems **Morgan, P and Walmsley, R** 76
Fair financial information practices in the USA **Eger, J** 290
Framework for the analysis of privacy and information systems **Blekeli, R** 214
Impact of privacy and security regulations on installation performance **Benjamin, A** 19
Information engineering **Scarrott, GG** 124
Information in insurance **Giles, P** 249
Information management: the relevance of professional codes of practice **Coan, DRA** 200
Information privacy and employment **Osborn, J** 30
Issues in Canadian/US transborder computer dataflow **Cundiff, WE** 53
Law and computer privacy in the states of the USA **Lautsch, J** 100
Norwegian privacy legislation **Selmer, K** 178
Norwegian Research Center for Computers and Law **Bing, J** 175
Personal identity verification **Sykes, D** 222
Privacy — an Australian experiment **Goldsworthy, A** 38
Privacy and computerized systems **Gavison, R** 270
Privacy controls: by people or machines? **Hawker, A** 16
Privacy legislation in the USA **Eger, J** 244
Privacy protection costs in record-keeping systems **Turn, R** 298
Privacy: security of computerized personal information **O'Connor, KP** 120
Privacy — the commonsense application of authority **Sauvarin, PT** 322
Project Goldfish **Norman, A** 8
Security in statistical databases for sum and count queries **Chin, FY and Ozsoyoglu, G** 148
Security — the organizational aspects **Shephard, P** 107
Six models for the social accountability of computing **Kling, R** 62
Systems audit for privacy and security **Dexter, J** 71
The way to the information society, **Engberg, O** 282
Towards a taxonomy for information systems **McKenzie, KI and Spiers, JD** 116
Transborder dataflow: a global view **Serwatynski, W** 133
Transborder dataflow barriers **Bigelow, R** 331
Transborder dataflow — lifeblood of multinationals **Serwatynski, W** 81
Transborder dataflow — the Scandinavian solution **Hafli, T** 326
UK Data Protection Committee Report: a discussion **Kenny, J** 183
Use of encryption methods to protect data **Taylor, FE** 111
US National Computer Crime Data Center **Becker, J** 220
Variety chains **Sauvarin, PT** 294

SUBJECT

AUDIT AND BUSINESS

Automation of bias: computer models and local government budgeting **Dutton, W and Kraemer, K** 303
Computer systems procurement **Medina, B** 315
Contacts between clients and organizations **Blekeli, RD** 265
Database management system: master or servant? **Scarrott, GG and Mitchell, RW** 208
Developing computer systems for personnel records **Williams, AP** 196
Establishment of audit trails in computer systems **Morgan, P and Walmsley, R** 76
Fair finaficial information practices in the USA **Eger, J** 290
Information in insurance **Giles, P** 249
Systems audit for privacy and security **Dexter, J** 71

BCS FORUM 45

CALENDAR 96, 144, 192, 280

COMPUTER MISUSE

Coming to terms with computer fraud **Moffett, J** 319
Database integrity checking **Moffett J** 274
Ethics and computers **Parker, D** 92
Impact of computers on trust in business **Parker, D** 44
Looking after backup media **Moffett, J** 92
Providing backup **Moffett, J** 190
Risks of disaster **Moffett, J** 366
Stalinist view of data protection **Moffett, J** 234
Stealing data **Moffett, J** 137

CONFERENCES

2nd conference on computers and human choice **Kling, R** 365
Emerging data protection and the social sciences' need for access to data **Dammann, U** 238

CORRESPONDENCE 273

ENCRYPTION

Encryption protection of data and computer systems **Pritchard, J** 154
Encryption protection of data and computer systems: Part 2 **Pritchard, J** 259
Use of encryption methods to project data **Taylor, FE** 111

INTERNATIONAL REVIEW

Protecting the individual 335

LITERATURE REVIEW 139

LEGISLATION

Anatomy of privacy and data protection **Sutcliffe, A** 255
Background to data protection in Europe **Carmody, F** 24
Code of practice for privacy **Waller, R** 22
Data legislation on the march **Hondius, F** 4
Data policy in Sweden **Freese, J** 226
Framework for the analysis of privacy and information systems **Blekeli, R** 214
Impact of privacy and security regulations on installation performance **Benjamin, A** 19
Information management: the relevance of professional codes of practice **Coan, DRA** 200
Law and computer privacy in the states of the USA **Lautsch, J** 100
Norwegian privacy legislation **Selmer, K** 178
Norwegian Research Center for Computers and Law **Bing, J** 175
Privacy — an Australian experiment **Goldsworthy, A** 38
Privacy legislation in the USA **Eger, J** 244
Protecting the individual 335
Swedish data policy **Aner, K** 145
UK Data Protection Committee Report: a discussion **Kenny, J** 183
UK Data Protection Committee Report **Ellison, R** 98
US National Computer Crime Data Center **Becker, J** 220
Variety chains **Sauvarin, PT** 294

MARKETPLACE

Institutions
Social services system 278
Transborder dataflow 277

Law
Call for papers 142
Computer law course 95
Mailing lists 276

Products
Access control 277
Access system 142

PRIVACY PERSPECTIVE

Australian privacy legislation **Osvald, T** 88
Information farming **Norman, A** 189
Regulations concerning data security **Osvald, T** 90
Transborder dataflow **Samet, PA** 231
US vs Miller and the right to financial privacy **Eger, JM** 230
Vulnerable computer society **Freese, J** 87

SECURITY

Access control requirements for privacy and security **Kingslake, R** 312
A 'perfect' computer crime **Jacobson, R** 160
Designing automated systems to ensure security and privacy **Medina, B** 203
Does computer security meet privacy requirements? **Ellison, R** 33
Personal identity verification **Sykes, D** 222
Privacy controls: by people or machines? **Hawker, A** 16
Privacy protection costs in record-keeping systems **Turn, R** 298
Privacy: security of computerized personal information **O'Connor, KP** 120
Security in statistical database for sum and count queries **Chin, FY and Ozsoyoglu, G** 148
Security — the organizational aspects **Shephard, P** 107
Towards a taxonomy for information systems **McKenzie, KI and Spiers, JD** 116

SOCIAL ISSUES

Achieving privacy — how to reorganize our databases **Davida, G** 218
Computer-held patient records: the Exeter project **Clarke, DJ, Fisher, RH and Ling, G** 164
Computers, information retrieval and privacy **Samet, PA** 172
Computers and human choice **Sizer, TRH** 194
Information engineering **Scarrott, GG** 124
Information privacy and employment **Osborn, J** 30
Information privacy — a paradox and a challenge **Douglas, S** 50
Privacy and computerized systems **Gavison, R** 270
Six models for the social accountability of computing **Kling, R** 62
The international community, information and privacy **Fisher, G** 242
The meaning of privacy **Stamper, R** 2
The way to the information society **Engberg, O** 282

TRANSBORDER DATAFLOW

Issues in Canadian/US transborder computer dataflow **Cundiff, WE** 53
Project Goldfish **Norman, A** 8
Transborder dataflow: a global view **Serwatynski, W** 133
Transborder dataflow — lifeblood of multinationals **Serwatynski, W** 81
